Dear Members of Alpha Kappa Psi,

My name is Abdul-Rahman Al-Zawawi, and I am a Junior Biomedical Engineering student at Wayne State University, passionate about applying engineering principles to solve real-world problems. I am eager to join Alpha Kappa Psi because I admire its commitment to developing principled business leaders and fostering a community where driven individuals collaborate, learn, and make a meaningful impact. With a strong foundation in technical skills such as MATLAB, and AutoCAD. I thrive in both collaborative and leadership settings.

My experiences have equipped me with skills that align with Alpha Kappa Psi's mission:

- **Leadership & Team Management:** As a Team Lead at Starbucks, I managed teams of 5–7 members in fast-paced settings, ensuring operational efficiency and fostering strong teamwork.
- **Problem-Solving & Technical Expertise:** My work in product design, including designing an artificial heart using AutoCAD, has honed my analytical thinking, creativity, and attention to detail.
- **Customer Service & Communication:** At The Home Depot, I delivered exceptional customer experiences while meeting strict deadlines, balancing multiple tasks efficiently

In addition to my professional experience, I actively contribute to student organizations, serving as Secretary of the 3D Modeling Club and participating in the Wayne State Engineering Club, BME Club, and MSA. These roles have strengthened my collaboration skills and deepened my commitment to continuous learning.

I am excited about the opportunity to grow as a principled business leader, contribute to AKPsi's mission, and collaborate with peers who are equally passionate about making an impact. I would be glad to interview and discuss how my experiences and goals align with the fraternity's values. Thank you for considering my application.

Sincerely,

Abdul-Rahman
