Formally address Alpha Kappa Psi,

I am Nazneen Chowdhury, a freshman majoring in accounting with a long-term goal of pursuing law school and eventually finding myself as a medical malpractice lawyer. What excites me the most is the opportunity to be hands on, especially when it comes to building things from scratch. Knitting has been a huge hobby of mine and has allowed me to instill myself with patience but also keen attention to detail. For me, APSKI isn't just a place to find opportunities but rather a community where I am able to sharpen my skills while being surrounded by likeminded people who are able to push me towards being a best version of myself.

Currently I work as a carryout cashier at Green Lantern Pizza, managing customer orders and handling transactions. I often deal with 40-50 customers within an hour whether on the phone or face to face, on days that are hectic and busy. This had given me the opportunity to learn how to be quick on my feet. Often dealing with uncomfortable situations, it has become important for me to take the initiative to find quick solutions to issues instead of pushing it onto someone else's plate.

My experiences but also hobbies have allowed me to refine myself as a person, building a strong foundation in adaptability, resilience, and having a problem-solving mindset. I want to offer these values to this fraternity and receive a strong and loving community. I am excited not only to grow professionally but also to be able to become a better version of myself.

Sincerely,

Nazneen Chowdhury
