Dear members of Alpha Kappa Psi,

My name is Ben Curd, and I am currently pursuing my Bachelor of Science in Global Supply Chain Management and Data Analytics. In my free time I enjoy working out, my physical health has always been important to me. On top of that I enjoy hands on project like working on engines. I grew up working on cars with my dad, so I've always had a passion for turning a wrench. Before deciding to go to business school I was in a technical program at Macomb Community College where I intended to become a mechanic. In the end I decided that I prefer working on cars as a hobby and not as a career. I want to join AKPSI because I want to meet new people all while learning as much as I can. I think AKPSI can help me become a better public speaker, presenter, and teach me how to better network with recruiters.

On top of that while learning to work on cars I also learn about the importance of time management, problem solving and critical thinking. Working on cars also gave me a passion for problem solving which is what drove me to becoming a supply chain major. I want to solve problems and make a difference while doing so. I also have leadership experience from my time at Chick-fil-A where I helped lead a team of 8-10 employees. I believe these skills can help benefit and grow AKPSI.

I am particularly impressed by AKPSI's mission to develop a worldwide network of principled business leaders through professional development. I firmly believe that by leveraging my leadership experience, time management skills, and commitment to continuous growth that I can help advance AKPSI's mission.

Lastly, I would love the opportunity to get to know more about AKPSI and its members. So far, the rushing process has been an incredibly experience that helped me step out of my comfort zone. I am excited about the potential to learn more from current brothers throughout the pledge process. Thank you for considering my application and I hope to hear from you about an interview.

Sincerely,

Benjamin Curd
