Dear Alpha Kappa Psi,

My name is Hadi Ahmed and I am a finance and supply chain double major. I love playing volleyball, skiing, networking, and learning new things. I am a highly skilled videographer and editor and have worked with celebrities such as Khabib Nurmagomedov, Islam Mackhachev, and certain streamers. I have been blessed with a multitude of opportunities and have gained a lot of knowledge and experience. With these blessed opportunities I have learned to make the most out of them and give it my all. There are tons of people who can do what I do much better than me but were not granted these opportunities, which is why whenever a big and unique opportunity comes about, I try my best to give it my all and succeed. It serves as one of my greatest motivations and I am also not scared of failure, Wayne Gretzky said “you miss 100% of the shots you don't take (I love hockey if the quote did not make it obvious). I love taking chances and trying new things because trying them and failing is still better than not trying at all.

Over the course of the past week, I have gotten to meet tons of new people with creative thoughts and vision. For example, Juliana helped me develop and grow my resume, talking and having fun with the brothers and people on game night, and building new friendships and bonds. Moments like these are what stand out to me about AKPSI and the values of brotherhood, integrity, knowledge, unity, and service. The experience I had so far is phenomenal and I would love to be in a position where I can one day help others enjoy this experience as well.

In summary, it would truly be an honor to be able to surround myself with this community, getting to know everyone and seeing their creativity, learning from their knowledge and experience, and getting their mentorship. This will all serve into refining each of us into the best versions of ourselves the same way iron sharpens iron. The beauty to it is that it truly is a cycle, we learn from each other and grow, but it does not just stop there, it continues on to the next batch of PNM's that will rush and that knowledge and experience will fluctuate to those far more than what we can imagine. This is why I would love to be interviewed, so I can serve and provide brotherhood, knowledge, integrity, and unity to those that will come after me, the same way that those present currently did for me and all the PNM's. If I don't get an interview, I am still incredibly grateful for the opportunity to rush and meet tons of new people as well as learning and gaining experience. Failure is not the end, but rather, just the beginning.

Sincerely,

Hadi Ahmed
