Dear Members of Alpha Kappa Psi,

My name is Shumyia Akther, and I am pursuing a major in Technology Information Systems & Analytics at Wayne State University. I am passionate about using technology, problem-solving, and data-driven insights to create organizational impact. I value collaboration, continuous growth, and service, which is why I am eager to join Alpha Kappa Psi. I see the fraternity as a place to develop as a principled business leader while contributing meaningfully to its mission.

My professional experiences have prepared me to be an active and engaged member. As an IT Project Manager Intern at PHINIA, I support project planning, communication, and Agile team collaboration. At Universal Logistics Holdings, Inc., I was promoted from Warehouse Clerk to Lead Warehouse Clerk within three months, where I managed inventory systems and coordinated shipments for OEM clients. My time at Hamtramck General Medical Practice strengthened my ability to adapt quickly, resolve issues, and communicate effectively with diverse stakeholders.

Some accomplishments I bring to AKPsi include:

- Internship experience in project management, Agile practices, and digital tool implementation.
- Leadership skills proven by rapid promotion to Lead Warehouse Clerk.
- Volunteer service at Center Line Public Library for 1.5 years, supporting events and patrons.
- Technical skills in Microsoft 365 (Excel, Power BI, Project, SharePoint) and multiple operating systems.

I admire Alpha Kappa Psi's dedication to professional development, mentorship, and service, and I am eager to support its efforts while growing as a leader alongside motivated peers. I would be honored to interview and share how I can contribute to the fraternity's ongoing success. Thank you for your time and consideration.

Sincerely,

Shumyia Akther

ALPHA KAPPA PSI
