Dear Members of Alpha Kappa Psi,

My name is Abdul-Rahman Al-Zawawi, and I'm a junior majoring in Biomedical Engineering at Wayne State University. I'm very interested about using engineering principles to take on real world problems, and I'm drawn to Alpha Kappa Psi's dedication to developing business leaders and creating a community where motivated individuals learn from one another and make a lasting impact. Along with a solid technical background like in MATLAB and AutoCAD, I thrive in both collaborative and leadership roles. Outside the classroom, I like to stay active by lifting weights and practicing mixed martial arts.

My experiences have given me skills that fit well with Alpha Kappa Psi's mission:

- **Leadership & Team Management:** As a Starbucks team lead, I guided 5–7 partners in high-pressure shifts, improving efficiency and fostering strong teamwork.
- **Problem-Solving & Technical Skills:** In product design projects such as creating an artificial heart model with AutoCAD I strengthened my analytical thinking, creativity, and attention to detail.
- **Customer Service & Communication:** At The Home Depot, I consistently delivered excellent service while meeting strict deadlines and balancing multiple responsibilities.

Beyond work, I stay engaged on campus as secretary of the 3D Modeling Club and as an active member of the Engineering Club, BME Club, and MSA. These roles have expanded my network and reinforced my commitment to continual learning.

I'm excited about the chance to grow as a values-driven leader, contribute to Alpha Kappa Psi's mission, and collaborate with peers who share my passion for positive change. It would be a pleasure to interview and discuss how my experiences and goals align with the fraternity's values. Thank you for your time and for the opportunity to express my interest in Alpha Kappa Psi.

Sincerely,

Abdul-Rahman

ALPHA KAPPA PSI
