Dear Alpha Kappa Psi,

My name is Mili Bharatiya, and I am a freshman double-majoring in finance and accounting. I chose finance and accounting as my major because of a class I took in high school. During that class, I found it very satisfying how balance sheets can be settled with simple formulas like (Assets = Liabilities + Equity). Some of my hobbies include cooking, playing the guitar, and watching sitcoms, and I also love trying to learn new skills, with juggling being my most recent venture. I also love spending time with my family and calling my best friends for hours on end.

Currently, I'm interning at Troy Community Coalition as a financial data processing intern, where I am responsible for digitizing and organizing financial records. Over the past three months, I've digitized six years' worth of data, ranging from 2018 to 2024, regarding donations and general financial transactions. Through this experience, I have learned corporate manners and financial insight, which act as building blocks for my long-term learning. In addition to my internship, I am working as a front desk receptionist at Great Oaks Country Club, which has taught me professional phone etiquette, event scheduling, and customer service. I'm also the Co-Founder and President of Junior Innovators, a nonprofit organization I started to teach K-12 students the fundamentals of business and entrepreneurship. My experience as a cofounder has taught me leadership, time management, and conflict resolution skills, which I exhibited by creating content that simplified complex ideas to be more comprehensive for young students.

All of the skills that I've gained through my experiences have developed me into the ideal member for AKPsi because I truly believe that leadership is about guiding others to be their best. I want to be a part of AKPsi because I find myself aligning with the community-centered environment that the brotherhood of AKPsi values so much. This fraternity's focus on giving back to the community makes it even more alluring. The organization's mission to develop a community that focuses on diversity, inclusivity, and building business leaders who can make a positive impact on the world is very admirable and something that I wish to contribute to.

I hope to move forward in my journey with AKPsi and get the opportunity to really showcase all my strengths and skill set. Contributing to AKPsi and really showing my support for their mission would be very rewarding. AKPsi is a community-driven organization that pushes its members to be the best version of themselves - something I aspire to have for myself.

Sincerely,

Mili Bharatiya
