EXPERIENCE

Warrior Consulting Group

Incoming Observer

Detroit, MI

Jan 2026 – Present

- Will be working on the Studir project with 7 teammates to aid the founder in the development of their application for market launch
- Anticipating a significant amount of financial returns over the next 4 years through the execution of our consulting team's roadmap
- Will assist with full-cycle application development and detailed data analysis to optimize the functionality of the application

Java Tutoring

Founder, tutor

Troy, MI

Jun 2024 – Jul 2024

- Designed and executed a 4-week Java curriculum for 15 high school students, creating lesson plans that prepared them for AP CSA
- Delivered 20+ hours of direct instruction, adapting complex Java concepts for high school freshmen to ensure high comprehension
- Mentored students with the help of 12 coding exercises, providing individual support and reviews to foster problem-solving skills

National Honors Society

Volunteer

Troy, MI

Sep 2023 – May 2025

- Assisted with over 30 special events and programs by maintaining clean and operational facilities to serve program's needs
- Supported engaging, fun and smooth-running events by aiding with organization and planning to maximize overall attendance
- Collaborated with over 100 students to execute the organization's events successfully, while also partnering with diverse hosts

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Terms and Conditions Checker

Self project

Detroit, MI

Dec 2025 – Jan 2026

- Worked with 4 teammates to build a working terms and conditions checker that can highlight dangerous terms and conditions
- This application supports 3 different types of inputs which include different text inputs, file inputs or image inputs formats
- Dedicated 30 hours to development, gaining technical proficiency in JavaScript and Python alongside foundational HTML

Currency Converter

Self project

Troy, MI

Sep 2025 – Oct 2025

- Engineered a functional currency converter application supporting 10 currencies to facilitate seamless financial data transactions
- Integrated real-time API synchronization to provide high-precision conversion rates, ensuring maximum reliability and accuracy
- Leveraged Java for backend logic and JavaScript for frontend interactivity, dedicating 20 hours to build this software application

Movie Recommender

Self project

Troy, MI

Jan 2025 – Feb 2025

- Developed a movie recommender system that effectively processes the IMDb Top Charts to suggest films from the 500 entries
- Strengthened programming skills in Python and JavaScript by dedicating 15 hours to build this interactive software application
- Integrated 6 specialized search filters to deliver precise, curated movie recommendations, significantly enhancing user experience

Other Affiliations: Wayne State Robotics Club, Wayne State Aerospace and Aviation Society, and Wayne Stock Trade Association
